umbling billows of the trackless deep:

tumbling billows of the trackless deep; but praise is justly due him if he has made the best of her tremendous powers, if he has read aright the currents of the sea and the lessons of the stars. And we should be ungrateful, if in this hour of prodigious prosperity we should fail to remember that William McKinley with sublime faith foresaw it, with indomitable courage labored for it, put

his whole heart and mind into the work of bringing it about; that it was his voice which, in dark hours, rang out, heralding the coming light; and over the twilight of the Nile the mystic hymns of Memnon announced the dawn of Egypt, waking from sleep.

Among the most agreeable incidents of the President's term of office were the two journeys he made to the South. The moral reunion of the sections—so long and so ardently desired by him—had been initiated by the Spanish War, when the veterans of both sides met on the same parched shoulder to shoulder together under the same banner. The President in these journeys sought, with more than usual

sequence and pathos, to create a sentiment which should endure forever the ancient feud. He was too good a politician to expect any results in the way of votes in his favor, and he accomplished none. But for all that, the good deed did not fail to bear its fruits. In warm and chivalrous hearts of that generous people, the echo of his cordial and brotherly words will linger long, and his name will be cherished in many a household where even yet the lost cause is worshipped.

AGAIN THE PRESIDENT.

Mr. McKinley was reelected by an overwhelming majority. There had been little doubt of the result, even as

well-informed people; but when it was known, a profound feeling of relief and renewal of trust were evident among the people of this country, and, not only in this country, but everywhere. They felt that the immediate future was secure, and that trade and commerce might safely push forward in every field of effort and enterprise. He inspired universal confidence, which is the life blood of the commercial system of the world. It began frequently to be said that such a man ought to continue; and, after months of speculation, it was said that the President was his own successor. He said, little at-

on to the suggestions, until they were repeated by some of his nearest friends. Then he saw that one of the most cherished traditions of our public life was in danger. The generation which has seen the prophecy of the Capital Throne—Non videtur annos Perire—twice repeated by the sovereignty of holy men was in peril of forgetting the unwritten law of our republic: Thou shalt not exceed the years of Washington. The President saw it was time to speak, and in his characteristic manner he spoke briefly, but enough. Where the lightning strikes there is no need of iteration. From that hour, no one dreamed of doubting

He felt that the harvest time was come, to garner in the fruits of so much planting and culture, and he was determined that nothing he might do or say should be liable to the reproach of a personal interest. Let us say frankly he was a party man; he believed the policy advocated by him and his friends counted for much in the country's progress and prosperity. He hoped in his second term to accomplish substantial results in the development and affirmation of those policies.

I spent a day with him shortly before he started on his fateful journey

Burials. Never had I seen him higher in hope and patriotic confidence. He was as sure of the future of his country as the palmist who has cried, "Glorious things are spoken of thee, O thou city of God." He was gratified to the heart that we had arranged a treaty which gave us a free hand in the isthmus. In fancy he saw the canal already built and the argosies of the world passing through it in peace and amity. He saw in the immense evolution of the Pacific the fulfillment of all his dreams, the release of all his labors. He was, I need not say, an ardent protectionist, never more sincere and devoted than during those last days of his life. He regarded

reciprocity as the bulwark of protection—not a breach, but a fulfillment of the law. The treaties which for years had been preparing under his personal supervision he regarded as ancillary to the general scheme. He was opposed to any revolutionary plan of change in the existing legislation; he was careful to point out that everything he had done was in faithful compliance with the law itself.

In that mood of high hope, of generous expectancy, he went to Buffalo, and there, on the threshold of eternity, he delivered to his members of tone, its nameless morality, its breadth of

"On fortune's crowning slope,
The pillar of a people's hope,
The center of a world's desire."

He was fortunate even in his untimely death, for an event so tragically killed the world imperatively to the immediate study of his life and character, and thus anticipated the sure victory of posterity.

Every young and growing people has met, at moments, the problems of destiny. Whether the question comes in Egypt, from a Sphinx, symbol of the hostile forces of omnipotent nature, or punishes with instant death our failure to understand her meaning; or

...ther it comes as in Jerusalem, from the Lord of Hosts, who commands the building of His temple, it comes always with the warning that the past is lost, and experience vain. "Your fathers, and your mothers are they? and the prophets, do they live forever?" There, the fathers are dead; the prophets are silent; the questions are new, and have no answer but in time.

When the horny outside case which protects the infancy of a chrysalis is suddenly burst, and, in a single abrupt shock, it finds itself floating on waters which had not existed before,

THAT LINE OF GOULD'S.

Wall Street Gives it Little Attention.

Espee Stock Keeps Up Despite Rumor.

J. J. Hill not a Captain of Industry—Campbell Succeeds Stubbs.

(BY DIRECT WIRE TO THE TIMES.)

NEW YORK, Feb. 27.—[Exclusive Dispatch.] Wall street does not seem to be alarmed over the report from California that George Gould and Prince Ponton have been named to succeed J. J. Hill as president of the Southern Pacific.

The "beats" have endeavored to use the report to "bear" Southern Pacific stock, but thus far it has held its own. The stock has, at times, in the past two days, sagged for lack of aggressive support, and the belief prevailed in the stock exchange that the "bull" party had suspended operations for the time being. It was noticeable later, however, that any pronounced tendency on the part of this stock to decline was promptly checked by inside buying.

STUBBS'S ASSISTANT.

BY THE NEW ASSOCIATED PRESS.—A.M.J. CHICAGO, Feb. 27.—Another influential official position that of assistant traffic director—has been created on the Southern Pacific. It. Campbell, traffic manager of the Oregon Railway and Navigation Company, has been appointed to the position. Campbell will continue his new duties on March 1, and have his office at the Southern Pacific Company's headquarters in the California building.

HILL IN NEW YORK.

BY THE NEW ASSOCIATED PRESS.—A.M.J. NEW YORK, Feb. 27.—James J. Hill, president of the Northern Securities Company, who has arrived here from St. Paul, denies that his presence is in connection with any proposed merger of the railroad company involved in the proposed action of Atty.-Gen. Knox, and says that he is here on a "high private in the rear rank."

YOUNG CORBETT'S OPEN OFFER.

CINCINNATI, Feb. 27.—Young Corbett, who has been named as the challenger of Governor McKinley, today offers a purse of \$10,000 for the Corbett-McGovern fight. The bid will be forwarded to the Cincinnati Enquirer before April 15.

PORTUNE IN CLOTHES.

St. Huntington's Widow Pays Almost Thirty Thousand Dollars Customs Duty on Purchases in Europe.

NEW YORK, Feb. 27.—Mrs. Arabella St. Huntington, widow of Col. P. St. Huntington, has paid \$27,500 in cash as customs duty on her purchases abroad. The duty was paid by the customs collector at New York, and probably in the city. The duty was the largest ever paid by a private citizen.

LAST FAREWELL TO EMERSON.

BOSTON, Feb. 27.—Funeral services over the body of William E. Emerson, the minister, were held in St. Joseph's church today. The church was filled with members of the theatrical profession and Order of Elks. The body was placed on a train for San Francisco.

FIRE PROOFING COMBINE.

PITTSBURGH, Feb. 27.—Negotiations will be commenced next Monday for the formation of the United States Fire Proofing Company, by the purchase and consolidation of eleven independent interests. The new company will have \$1,500,000 capital and \$500,000 of bonds, but this capital will be increased in two weeks to \$2,000,000.

LAW FOR LABOR UNIONS.

LEAVENWORTH (Kan.) Feb. 27.—In the City Court here today Manager De Courcy of the Leavenworth Street Car Company, was fined \$50 for dismissing W. P. Sullivan, an employee, because he was connected with a labor union. This is the first conviction under the new State law.

BURNED GOLF STAMPS.

NEW YORK, Feb. 27.—The postmaster at Colon, N. J., a suburb of Metuchen, has made an affidavit before Recorder Moss of that city that he destroyed \$500 worth of United States postage stamps worth \$2000, by fire in the post office.

MISS STONE UNCERTAIN.

SALONICA, Feb. 27.—Miss Stone's abduction is not likely to prove of much importance in fixing the responsibility for an attempt on Turkey or Bulgaria, since she is not aware whether she crossed the boundary, owing to the fact that she was asleep.

PANIC AMONG ACTORS.

Feb. 27.—Fire in the upper balcony of the Grand Opera House today caused a panic among the actors. The fire was caused by a gas lamp, and the actors fled in confusion, but all escaped.

EULOGY.

(CONTINUED FROM THIRD PAGE.)

whose strength it has never tested, among dangers it cannot foresee and without experience to measure, every motion is a problem, and every hesitation may be an error. The past gives no clue to the future. The future, where are they and the prophecies, do they live forever? We are ourselves the fathers! We are ourselves the prophets! The questions that are put to us we must answer without delay, without help, for the Sphinx allows no one to pass.

THE GENIUS OF PATIENCE.

At such moments, which have already occurred at least twice in the brief history of our own lives, we may be humbly grateful to have had leaders simple in mind, clear in vision, as far as human vision can safely extend; penetrating in knowledge of men, simple and flexible under the strains and pressures of society, instinct with the energy of new life and undisturbed, cautious, calm, and above all, gifted in a supreme degree with the most surely victorious of all political virtues, the genius of infinite patience.

The obvious elements which enter into the fame of a public man are few and by no means recedent. The man who fills a great station in a great change, who leads his country successfully through a time of crisis; who, by his power of persuading and controlling others, has been able to command the best thought of his age, so as to leave a permanent moral and material condition in advance of where he found it—such a man's position in history is secure. If, in addition to this, his written or spoken words possess the subtle quality which carry them far and lodge them in men's hearts; and, more than all, if his utterances and actions, while informed with a lofty morality, are yet tinged with the glow of human sympathy, the fame of such a man will shine like a beacon through the mists of ages, an object of reverence, of imitation, and of love.

It should be to us an occasion of solemn pride that in the three great crises of our history such a man was not denied us. The moral value to a nation of a man such as Washington, Lincoln and McKinley is beyond all computation. No loftier ideal can be held up to the emulation of ingenious youth. With such examples we cannot be wholly ignoble. Grateful as we may be to those who did, let us be still more grateful for what they were. While our daily being, our public policies, still feel the influence of their work, let us pray that in our spirits their lives may be visible, calling us upward and onward.

STORM OF APPLAUSE.

Throughout the delivery of the speech the audience listened with great interest, but the peroration, coupling together, as it did, all the names of Washington, and Lincoln, and McKinley, seemed especially to impress the hearers, and as Secretary Hayes uttered the last solemn words, "Lead, kindly light," played by the Marine Band, the President and the members of the Supreme Court, and the members of the House of Representatives, all rose and applauded with a fervor which lasted for several minutes.

ODONOVAN ROSS DYING.

COLORADO SPRINGS (Colo.) Feb. 27.—O'Donovan Rossa, the celebrated Fenian agitator, is dying at St. Francis Hospital here of blood poisoning. An operation was performed, taking off the large toe of the left foot, and that of the right foot, which was only hope for Rossa lies in amputation of the entire foot, and the patient has been notified, and the doctors announce that there is little chance for his recovery.

D. A. R. DAY AT EXPOSITION.

CHARLESTON (S. C.) Feb. 27.—This was a great day for the daughters of the American Revolution at the exposition. Overwhelming plaudits greeted the arrival of the D. A. R. at the exposition. The chief speakers at the Auditorium. Both naval heroes are the special guests of the D. A. R. The services at the Auditorium were long and inspiring.

GREAT STATE OF UNION.

Scott Tells Easterners About California.

Markets of Asia Call for Our Products.

Immense Possibilities of the Orient Appealing to the World-Powers.

(BY DIRECT WIRE TO THE TIMES.)

NEW YORK, Feb. 27.—[Exclusive Dispatch.] Irving M. Scott, the great Californian shipbuilder, is a guest at the Waldorf. He was one of those present at the dinner given at Sherry's yesterday, by the captains of industry to Prince Henry.

Scott talked freely today of affairs on the Pacific Coast. He is enthusiastic over the great future in store for California. The Mail and Express this afternoon printed a column interview, in which Scott says: "As a result of American acquisition of the Philippines there are now building at the Union Iron Works five great ships, three for the government, and two for traffic, besides a number of smaller vessels. The cost of these vessels almost \$10,000,000, and more contracts are coming. Our country facing the Pacific is almost wholly unprotected. California's population is only nine to the square mile, while in Belgium they have 508. Taken as a whole, the State is the most fertile in the Union. The rivers of our Pacific Slope run unchained from mountains to sea; the forests are uncut, and the possibilities of the land have only been scratched.

"The development of this natural wealth has its immediate relation to transportation covering a world-wide area. The west coast of America is bound to be a great supply camp for the Orient. It is a fact that neither the Orient nor the United States can afford to neglect the commerce and exploitation of the Pacific. These routes of transportation are the basis of the extension of our commerce.

"I favor the passage of the Ship Subsidy Bill, as I favor the development of our inland waterways. The United States is a great inland country, and it is a fact that neither the Orient nor the United States can afford to neglect the commerce and exploitation of the Pacific. These routes of transportation are the basis of the extension of our commerce.

THE LAND:

Orchard, Farm, Gardea, Rancho and Stockyard.

NOTES AFIELD.

Lee on Drainage and Irrigation.
 IN ANOTHER column will be found a very interesting and novel article on topics of utility to the soil. It is safe to say that within the last ten days the rains have turned thousands to the land again in this State who had but little interest in the face of a dry year. Mr. Lee's article should receive careful consideration.

Rural Items.

The last few days have caused the farmers to hibernate, for the time being, to just be satisfied to see around the small fire and watch it rain. However, when the awakening comes things will fairly hum in the rural districts, especially where everything was at a standstill ten days ago waiting for rain. The greatest activities will prevail in orchard planting, sugar-beet planting and in the raising of stock. In the latter field some rearing will be necessary on the mesa or thin lands, but the bulk of the planting is done, and the grain fairly started. We are assured a prosperous season.

Gump in Eggs.

The recent report of a local dealer getting left on a carload or so of eggs resulting in the loss of the eggs is getting in its work. On the 24th of last December The Times published the use of this food. In this note the editor declares a steady gain in the use of this food. In this note the editor declares a steady gain in the use of this food. In this note the editor declares a steady gain in the use of this food.

Gila Culture.

The proposition to set aside a portion of the Gila National Park for silk culture is getting in its work. On the 24th of last December The Times published the use of this food. In this note the editor declares a steady gain in the use of this food. In this note the editor declares a steady gain in the use of this food.

Of Interest to Farmers.

The use of carbon bisulphide is becoming common in the destruction of gophers, squirrels and insects that are of value at this time. The use of this substance is becoming common in the destruction of gophers, squirrels and insects that are of value at this time. The use of this substance is becoming common in the destruction of gophers, squirrels and insects that are of value at this time.

The carbon bisulphide treatment as applied to agricultural economy may be of value in the extermination of gophers, squirrels and insects that are of value at this time. The use of this substance is becoming common in the destruction of gophers, squirrels and insects that are of value at this time. The use of this substance is becoming common in the destruction of gophers, squirrels and insects that are of value at this time.

It will be seen from this partial catalogue of the utilities of carbon bisulphide that this substance is of prime importance to the farmer, as there is almost unlimited latitude to the application of this useful chemical. It may be purchased in small quantities for 25 or 30 cents a pound, and at 10 or 15 cents in wholesale quantities. It is the most economical of all the insecticides, and is the most effective in killing the most resistant insects.

The use of carbon bisulphide is becoming common in the destruction of gophers, squirrels and insects that are of value at this time. never last. Altogether it is a time of great rejoicing, for good crops are assured for the citrus and deciduous fruit grower and an abundant harvest in grain and hay almost assured to the farmers.

Warning from Hilgard.

Many orange growers use culis for fertilizers, hauling the waste oranges from the packing-houses and spreading the souring fruit about between the rows of orange trees. Prof. Hilgard of the University of California has recently stated that the black spots on the fruit so noticeable this year are caused by allowing oranges to rot upon the ground. The bacteria follows up through the root and branches to the ripening fruit, or the spores of the rot fall upon the surface of the fruit, it is so much in the way of cultivation that there is no particular reason for applying culis to the field, even were they not infectious.

Prof. Hilgard says that oranges should be thoroughly composted before using for fertilizers. The waste oranges should be put in a layer of soil, not only on account of the blue mold, but also on account of the essential oils and the acid, which should first be destroyed by fermentation. Sprinkle the fruit with lime, then cover with a layer of soil, then another layer of culis and so on. In a couple of months this compost will be sufficiently decomposed to render it available without detriment.

"If you throw oranges into a weed patch you will find them in the weeds immediately around them will not thrive very well, and some will be killed, not on account of the oil in the rind."

Be Spoke the Son.

The agricultural editor of the Chronicle wrote in last week's issue: "The beekeepers of the southern counties seem to be having a hard time. The bees are dying in large numbers. The cause is not clear, but it is not the case in some of the northern counties where the bees are doing well."

drained soils, and with a limited supply of water, is almost certain to end in disappointment and ultimate failure. The feeding roots develop so near the surface, and become at once at the mercy of their three pronounced enemies, heat, cold and wind.

The remedies for these combined ills are subirrigation and drainage, when properly laid. There are numerous ways by which this may be accomplished, and which are now in practice, upon which I will offer no comment here, but will briefly detail a system which I have inaugurated, allowing my name to go with it upon its merits, as the most lasting, economic and thoroughly-practical means of subirrigation and drainage combined.

The drains are of ordinary drain tiles, two and one-half or three inches in diameter, or cement tiles, laid in a trench, and covered with a layer of soil, or, preferably, knife slits across the pipe about twelve inches apart.

The drains are laid in a trench, and covered with a layer of soil, or, preferably, knife slits across the pipe about twelve inches apart. The drains are laid in a trench, and covered with a layer of soil, or, preferably, knife slits across the pipe about twelve inches apart.

for the highest. Brains and labor combined never counted for more than money on the fruit farm. The man who possesses the ability and push to raise fine fruits, is in a fair way to make something out of the good thing.

It is a good thing, probably, that the incompetents are dropped out of the fruit-growing business. The failure is an assurance to the reliable and intelligent growers that they will make more profit. These ignorant growers give the whole fruit business a bad name.

It is not that they frighten others from the business by their half-matured products. They actually demoralize some markets, which must inevitably affect the goods of those who have been careful of their work. The sooner we get rid of the croakers in the fruit business, the better it will be for the whole trade, and we can afford to lose them.—H. W. Chambers, in American Agriculturist.

Reorganization.
 The California Raisin Association has issued a call for a meeting to be held at Fresno on the 10th of March, for the purpose of reorganizing the association for the ensuing year.

The call states that the association is in need of reorganization, and that the meeting is for the purpose of electing a new board of directors and officers for the ensuing year.

The call also states that the association is in need of reorganization, and that the meeting is for the purpose of electing a new board of directors and officers for the ensuing year.

MINES AND MINING.

SILVER QUEEN READY FOR ACTIVE WORK.

OLD BONANZA KING AGAIN TO BE A SILVER PRODUCER.

Diabele Buys More Property at Wickburg—Woman Miner Develops a Bonanza at Mineral Park—Pickings from Various Dumps.

Dr. Umber, president of the Silver Queen Mining and Reduction Company, has sent word from Philadelphia that he will arrive at the company's mines in the Providence Mountains soon after March 1, to begin active operations in prospecting and working the old Bonanza King mine, which was abandoned years ago on account of the burning of the mill at Providence and litigation over the mining property. The Silver Queen Company, which is now in possession, proposes to erect a mill of 10 stamps to replace the one of twenty stamps that was burned. For a year past the company has spent a good deal of time and money in the development of water, a sufficient supply of which is now assured for operations on a large scale. The mine, which is situated about twenty-five miles north-west of Fenner, on the Santa Fe Railroad, the nearest shipping point, is the best-developed property in the Providence mining district, and has been a heavy producer of silver. It also carries some gold and other minerals.

SALE AT WICKBURG.

E. W. Fisher, for several years identified with mining properties in the Wickburg district, has sold to the Diabele Mining Company of this city, another of his properties in the Wickburg district. The land, which is situated about fifteen miles east of Wickburg, is not only of very rich soil, but is conveniently situated for work. The purchase price was \$100,000. Fisher had a mine in that neighborhood for some time.

PICKINGS FROM DUMP.

R. T. Grant, who has been operating in the Los Burros mining district, on the northern line of San Luis Obispo county, reports the finding of some very rich ledges on his property. His claims are on Spruce and Dog Vine creeks, and he is now making preparations for beginning active work. The Silver City reduction works, the site of that town, the Argus, of the kind in New Mexico, are running day and night, and commencing the first of next week will be operating at their fullest capacity. The smelter has three large furnaces and a daily capacity of 250 tons.

ACTIVITY IN ARIZONA.

GOLD-ROAD DEVELOPMENT. (SPECIAL CORRESPONDENCE OF THE TIMES.) PRESCOTT (Ariz.) Feb. 28.—Development is proceeding actively on the Gold Road, claims in Mohave county, thirty miles west of Prescott, and the main shaft has been equipped with a gasoline hoist and air compressors for the running of machine drills. R. T. Grant, who has been operating in the Los Burros mining district, on the northern line of San Luis Obispo county, reports the finding of some very rich ledges on his property. His claims are on Spruce and Dog Vine creeks, and he is now making preparations for beginning active work. The Silver City reduction works, the site of that town, the Argus, of the kind in New Mexico, are running day and night, and commencing the first of next week will be operating at their fullest capacity. The smelter has three large furnaces and a daily capacity of 250 tons.

OLD CAMP OF MINERS.

The old camp of Miners Park has jumped into prominence again, and largely through the work of a woman, Mrs. John Kay, a practical miner despite her sex. Mrs. Kay is not only a new woman, but she is athletic and a fire. She has been developing the King mine, Monday several of her men had been off to work, and she is believed to be a bonanza, a new ore body that reveals the existence of a large deposit of a considerable sprinkling of gold. The ore is simply full of gold.

WILSON'S GOOD NAME.

A young miner, C. Wilson, rather discouraged with the showing of a prospect in which he was interested, sold his one-fourth share for \$200. A few weeks later he received a return of \$100,000. Wilson's good name is a well-known fact. He has been developing the King mine, Monday several of her men had been off to work, and she is believed to be a bonanza, a new ore body that reveals the existence of a large deposit of a considerable sprinkling of gold. The ore is simply full of gold.

OLD MAN FIERCE.

M. Dalton, superintendent of the Victor Hall Oil Company, has been in the Police Court yesterday for allowing Lake Shore to dump refuse in a vacant lot. The court ordered the company to remove the refuse and to pay a fine of \$100. Dalton was fined \$100.

YOUNG GIRL A THIEF.

William, a girl 14 years old, guilty to a charge of larceny, was sentenced by Justice to the House of Correction for six months.

CAR HITS WHEELMAN.

M. J. Jansen, a painter, living at 1111 Winston street, was struck by a car while riding a bicycle. The car was driven by a man named Smith. Jansen was injured and taken to the hospital. The driver of the car was arrested and charged with manslaughter.

"The Académie de Médecine of France Has Passed Pollinaris"

At the Head of All Waters Examined for Purity and Freedom from Disease Germs.

EXCEPTIONAL ACTIVITY IN JEROME DISTRICT.

UNITED VERDE AND OTHERS NOW RUNNING FULL BLAST.

East and West of Wickburg Miners Are Busy—Work on Phoenix and Eastern Railway Being Pushed—Will Tap Bradshaw Mountains. (SPECIAL CORRESPONDENCE OF THE TIMES.) PRESCOTT (Ariz.) Feb. 28.—Exceptional activity is noted in the mines around Jerome. The greatest mine of the district, the United Verde, is running with a larger force of men than ever, despite the comparatively low price of copper. Much has been said during the past week of the signing of a new shaft to replace the old one, which has been in a dangerous condition for several years. The management designed that the shaft should be in country rock wholly to avoid the possibility of shifting. Unexpectedly, and almost unwelcome, several bodies of very rich ore, however, were found in the upper part of the new shaft. The new shaft is about 400 feet north of the present working shaft. It is 1000 feet in size, within timber, with three compartments, and is now practically complete from the 700-foot level to the surface. The machinery, which has been stored at Congress Junction for the past year, comprises probably the finest hoisting equipment in the Southwest, and is capable of handling 3000 tons. The galloway frame is a two double-decker cages to the depth of 3000 feet. The galloway frame is a two double-decker cages to the depth of 3000 feet. The galloway frame is a two double-decker cages to the depth of 3000 feet.

GOVERNMENT TO LEASE SAN NICOLAS ISLAND.

FIVE-YEAR OCCUPATION GOES TO HIGHEST BIDDER.

Uninhabited and Barren Waste Once the Home of an Ancient Tribe of Indians, Whose Relics Abound—Abundant Water but No Vegetation.

San Nicolas Island is to be leased by the government to the highest bidder for a five-year term. The island is located in the Gulf of California, about 100 miles south of San Diego. It is a barren waste, with no vegetation and no inhabitants. The only water on the island is in the form of brackish pools. The island is rich in minerals, and is believed to contain large deposits of copper and silver. The government has received several bids for the lease of the island, and the highest bidder will be awarded the lease for a five-year term.

WHITLAW LEAVES DEBT.

Premier of Home-Buying Proposition Disappears Suddenly and Now Los Angeles Creditors Mourn.

J. D. Whitlaw, president of the "Co-Partners Association of America," a working proposition for the development of the Malachite Copper-Gold Company in the Malachite Mountains, has disappeared suddenly. Whitlaw was a prominent figure in the mining industry, and his disappearance has caused much concern among his creditors. He was last seen in Los Angeles, where he was attending to business. His disappearance is believed to be a result of financial difficulties. His creditors are now trying to locate him and recover their debts.

SATISFACTORY TEST.

ORE OF OLD MOUNTAIN RICH.

A working test was made yesterday of ore taken from the property of the Malachite Copper-Gold Company in the Malachite Mountains, fourteen miles south of Daguerre. Test was made in the smelter at Llewellyn Iron Works and the ore treated was average pay dirt from six different shafts on the property. The result was very satisfactory. The copper runs about 16 per cent. James B. Cook states that the company is making good progress in the development of its property, and will probably make some important improvements in the spring.

WORK ON NEW ROAD BEGUN.

Grant Bros. of this city have been awarded a contract for the grading of sixteen miles of road for the new branch of the Prescott and Eastern Railway. This branch, the work on which has already been begun, will extend well into the Bradshaw Mountains of Arizona.

GOVERNMENT TO LEASE SAN NICOLAS ISLAND.

FIVE-YEAR OCCUPATION GOES TO HIGHEST BIDDER.

Uninhabited and Barren Waste Once the Home of an Ancient Tribe of Indians, Whose Relics Abound—Abundant Water but No Vegetation.

San Nicolas Island is to be leased by the government to the highest bidder for a five-year term. The island is located in the Gulf of California, about 100 miles south of San Diego. It is a barren waste, with no vegetation and no inhabitants. The only water on the island is in the form of brackish pools. The island is rich in minerals, and is believed to contain large deposits of copper and silver. The government has received several bids for the lease of the island, and the highest bidder will be awarded the lease for a five-year term.

WHITLAW LEAVES DEBT.

Premier of Home-Buying Proposition Disappears Suddenly and Now Los Angeles Creditors Mourn.

J. D. Whitlaw, president of the "Co-Partners Association of America," a working proposition for the development of the Malachite Copper-Gold Company in the Malachite Mountains, has disappeared suddenly. Whitlaw was a prominent figure in the mining industry, and his disappearance has caused much concern among his creditors. He was last seen in Los Angeles, where he was attending to business. His disappearance is believed to be a result of financial difficulties. His creditors are now trying to locate him and recover their debts.

SATISFACTORY TEST.

ORE OF OLD MOUNTAIN RICH.

A working test was made yesterday of ore taken from the property of the Malachite Copper-Gold Company in the Malachite Mountains, fourteen miles south of Daguerre. Test was made in the smelter at Llewellyn Iron Works and the ore treated was average pay dirt from six different shafts on the property. The result was very satisfactory. The copper runs about 16 per cent. James B. Cook states that the company is making good progress in the development of its property, and will probably make some important improvements in the spring.

WORK ON NEW ROAD BEGUN.

Grant Bros. of this city have been awarded a contract for the grading of sixteen miles of road for the new branch of the Prescott and Eastern Railway. This branch, the work on which has already been begun, will extend well into the Bradshaw Mountains of Arizona.

Good Samaritan.

Donations of cast-off clothing, etc., for Good Samaritan hospital, 1111 Winston street, Tel. John 3. and Wagon 1111.

Makes Old Age Vigorous

Paine's Celery Compound the Greatest Nerve Tonic.

Paine's Celery Compound is the greatest nerve tonic ever given to the world. It is particularly effective when the system is gradually wasting away in old age, and when each separate organ is predisposed to degeneration. Paine's Celery Compound restores a vigorous old age possible. It keeps the nervous system in a normal condition of health; it keeps the digestive organs in perfect condition; it keeps the liver and kidneys active and in perfect health; it keeps the blood pure and healthy; it keeps the heart strong and healthy; it keeps the lungs clear and healthy; it keeps the stomach strong and healthy; it keeps the bowels regular and healthy; it keeps the skin clear and healthy; it keeps the hair from falling out; it keeps the eyes from becoming weak; it keeps the ears from becoming deaf; it keeps the nose from becoming runny; it keeps the throat from becoming hoarse; it keeps the voice from becoming weak; it keeps the memory from becoming weak; it keeps the mind from becoming weak; it keeps the body from becoming weak; it keeps the soul from becoming weak; it keeps the spirit from becoming weak; it keeps the life from becoming weak; it keeps the love from becoming weak; it keeps the hope from becoming weak; it keeps the faith from becoming weak; it keeps the charity from becoming weak; it keeps the grace from becoming weak; it keeps the glory from becoming weak; it keeps the honor from becoming weak; it keeps the power from becoming weak; it keeps the wisdom from becoming weak; it keeps the knowledge from becoming weak; it keeps the understanding from becoming weak; it keeps the insight from becoming weak; it keeps the perception from becoming weak; it keeps the sensation from becoming weak; it keeps the emotion from becoming weak; it keeps the passion from becoming weak; it keeps the desire from becoming weak; it keeps the will from becoming weak; it keeps the power from becoming weak; it keeps the wisdom from becoming weak; it keeps the knowledge from becoming weak; it keeps the understanding from becoming weak; it keeps the insight from becoming weak; it keeps the perception from becoming weak; it keeps the sensation from becoming weak; it keeps the emotion from becoming weak; it keeps the passion from becoming weak; it keeps the desire from becoming weak; it keeps the will from becoming weak; it keeps the power from becoming weak; it keeps the wisdom from becoming weak; it keeps the knowledge from becoming weak; it keeps the understanding from becoming weak; it keeps the insight from becoming weak; it keeps the perception from becoming weak; it keeps the sensation from becoming weak; it keeps the emotion from becoming weak; it keeps the passion from becoming weak; it keeps the desire from becoming weak; it keeps the will from becoming weak; it keeps the power from becoming weak; it keeps the wisdom from becoming weak; it keeps the knowledge from becoming weak; it keeps the understanding from becoming weak; it keeps the insight from becoming weak; it keeps the perception from becoming weak; it keeps the sensation from becoming weak; it keeps the emotion from becoming weak; THE CITY IN BRIEF.

NEWS AND BUSINESS.

Scriber's Club Dinner.

The Scriber's Club gave a dinner last night at the Maudslayi Hotel, and was afterward entertained at the Los Angeles School of Dramatic Art.

Bankruptcy Petition.—A petition in bankruptcy has been filed by William R. Bell, a Los Angeles real-estate broker, who schedules liabilities of \$25,157; assets, \$13,050.

Malucky Mar Two Chins.—Mar Two Chin, charged with being unlawfully in the United States, was arrested yesterday before Commissioner Van Dyke. His examination was set for March 15.

Reception Postponed.

The reception at the Los Angeles College of Fine Arts Wednesday evening was postponed on account of the rain. The collection of Grand Canyon paintings will show at the college every afternoon for two or three weeks.

February Memorial.—Hampden school will hold a February memorial at 1:30 o'clock this afternoon, in which the birthdays of Washington, Lincoln and the school will be commemorated. The school is handsomely decorated for the occasion and the Board of Education has been invited.

Car Knocked Him.—David Tucker, a quarryman who came to Los Angeles recently from Connecticut, was painfully injured at the Temple Block last night. He was crossing the tracks and was too drunk to notice an approaching car, which struck him. He was removed to the Good Samaritan Hospital. His injuries are not serious.

Delayed Feather-pulling.—The unsettled condition of the weather has caused a further postponement of the plucking of some of the big birds at the Osterich Farm, Inc., set for March 3 and 4. Tickets issued to Chamber of Commerce members for the Washington's Birthday will be honored on the postponed date.

W.C.T.U. and "Paganism."—The Los Angeles W.C.T.U. met yesterday afternoon in the first meeting of the new year. The subject of the evening was "Paganism," which was handled by Mrs. Anna E. U. Miller, who handled the subject in an interesting and instructive manner.

Delayed by Heavy Sea.—Anxiety has been felt at San Pedro concerning the steamship Coast Star, which is two days overdue at that port. Inquiry at the office of the Pacific Coast Steamship Company in Los Angeles shows that there is no reason for uneasiness. The delay has been caused by a rough sea which made landing of freight difficult at northern ports. She landed at Ventura yesterday and will probably reach San Pedro today.

Three Hats and Umbrellas.—The Chamber of Commerce committee that had charge of the banquet Saturday night feels responsible to a certain extent for the manner in which hats, umbrellas and other belongings were taken away from the guests. Requests that all persons who were at the feast examine their belongings and returning to make sure they have their own property. Exchanges will be made at the Chamber of Commerce office.

Free Space Offered.—The Chamber of Commerce has gained such a reputation as an exhibit maker that it now has extra space for the installation of a display at the American Exposition to be given at the Crystal Palace, London, March 10 to 15, 1934.

Property Investments.—J. G. Schaefer has purchased of Jeremiah Collins, holding three tracts of land, each on the south side of Sixteenth street between Figueroa and Georgia streets, with three two-story frame dwellings, and a lot of the same dimensions on the north side of Seventeenth between the same thoroughfares, with modern cottage dwelling, for \$14,000, as an investment. Mrs. Mary A. Glass, formerly of Vancouver, B. C., has bought of Mrs. Bertha L. Hanna, as an investment, through A. T. Jorgins & Co., 424 1/2 feet on the north side of Orange street between Union avenue and Valencia street, with a two-story frame apartment building containing four six-room flats, for \$20,000.

Trying to Save Handwriting.—Certain friends of J. Ambrose Handwright, now in the County Jail accused of having snatched a purse from a woman at Third street and Broadway, are making every effort to save him from the penitentiary. The prosecuting witness has been seen by these friends and advised to leave him to the penitentiary. The case against Handwright is very strong, and as he has told several stories about what he did on the night of the robbery, the officers believe him to be guilty and will be all the more anxious in the prosecution.

REVIEWER.—It is our pleasure to inform the ladies of Los Angeles and vicinity that in accordance with the custom now established, we have abolished the "formal" openings. Our stock for spring and summer is complete and will be open for inspection on and after Monday, March 5. No cards. R. S. Spier, miller, 122 S. Spring street, sole agent.

Plants for the home and garden at Meeser's Nursery. 625 S. Broadway. Logan berry, \$2 per 100; all kinds of berries. Meeser's 625 S. Broadway.

MARRIAGE LICENSES.—Following were the marriage licenses issued yesterday from the office of the County Clerk:

Eugenio Abila, aged 25, a native of Mexico, and Gertrude Marron, aged 45, a native of California; both residents of Los Angeles.

Ernest P. Gansert, aged 25, a native of Indiana, and Gertrude M. Woffenden, aged 18, a native of California; both residents of Los Angeles.

John A. Gray, aged 25, a native of California, and a resident of Los Angeles, and Grace Y. Hall, aged 25, a native of Michigan and a resident of Santa Monica.

Charles L. Callender, aged 25, a native of Canada, and Lillian M. Dowdell, aged 18, a native of South Dakota; both residents of Los Angeles.

Ramon Ayala, aged 25, a native of California and a resident of Carpinteria, and Angelina Navarro, aged 15, a native of Mexico and a resident of Los Angeles.

George Faxon, aged 45, a native of Pennsylvania, and Frances Silva, aged 24, a native of California; both residents of Verdandale.

DEATH RECORD.—JONHON—February 22, 1934, at the home of Mrs. John H. Johnson, aged 82, Los Angeles. Mrs. Johnson was born in England. Funeral services at 10 a. m. at the home. Burial in the Hollywood cemetery.

PERELESS BRAND WINES.—FOR YOUR EASTERN FRIENDS. We will deliver free of freight charges to any railroad station in the United States.
